

International Meeting of Students in Physical Oceanography

22-24 October 2008

Scripps Institution of Oceanography
La Jolla, California, USA

The primary goal of IMSPO is to bring together students in physical oceanography and the related fields of environmental fluid dynamics, atmospheric physics, biophysical interactions and ocean-atmosphere interactions to engage in scientific discussion and forge future relationships in a friendly and supportive environment.

We invite graduate students in physical oceanography and related fields to submit abstracts.

**Abstracts due
1 September 2008**
